## SCHOOL REPORT.

---

Among the many and varied duties of the School Board no one encounters as many conflicting opinions among the citizens of the town as to the construction of the law in relation to carrying scholars to and from school. It is evident that some uniform rule should be adopted. As the law itself is not mandatory but only permissive, it remains for the School Board to make such suggestions as, in their judgment will best comply with the whole school law. Chap. 7, Sec. 16 makes it the duty of every parent or other person residing in any school district, and having charge of children between the ages of eight and fourteen years to send them to school themselves if one is taught within two miles, by the nearest traveled road, and under this provision of the law, as the schools are now arranged, it is considered just and equitable to pay for conveyance only in excess of two miles. There are many things in school affairs that will bear a constant repetition. One of the more prominent is that irregular attendance is the worst feature of the common schools at the present time, and no raising of additional money, or lengthening the schools in any manner is an adequate compensation for the same.

The School Board do not deem it their duty and certainly do not consider it a pleasure to praise their own work, but submit the whole matter of the past management of the schools and the progress made therein to all persons in town who are in any way interested in the same.

The retiring member of the School Board by leave of the remaining members takes this opportunity to return his warmest thanks to the teachers, parents, scholars, and all others with whom he has come in contact during his term of office, for their uniform courtesy and forbearance and for their constant efforts to make the schools a success.
